

Agency Partnership Network

A collaborative force
against hunger

Flagship Program

Feeding Northeast Florida's Agency Partnership Network forms the backbone of our hunger-relief efforts, providing millions of pounds of food and resource to more than 400 nonprofits across our 12-county service area.

By supplying these partner agencies with the food they need, we empower these trusted organizations, including churches, community groups, and social service organization, to operate their individual feeding programs, reaching neighbors facing food insecurity right where they live.

**38.2 million
pounds of food
distributed in
2025 alone**

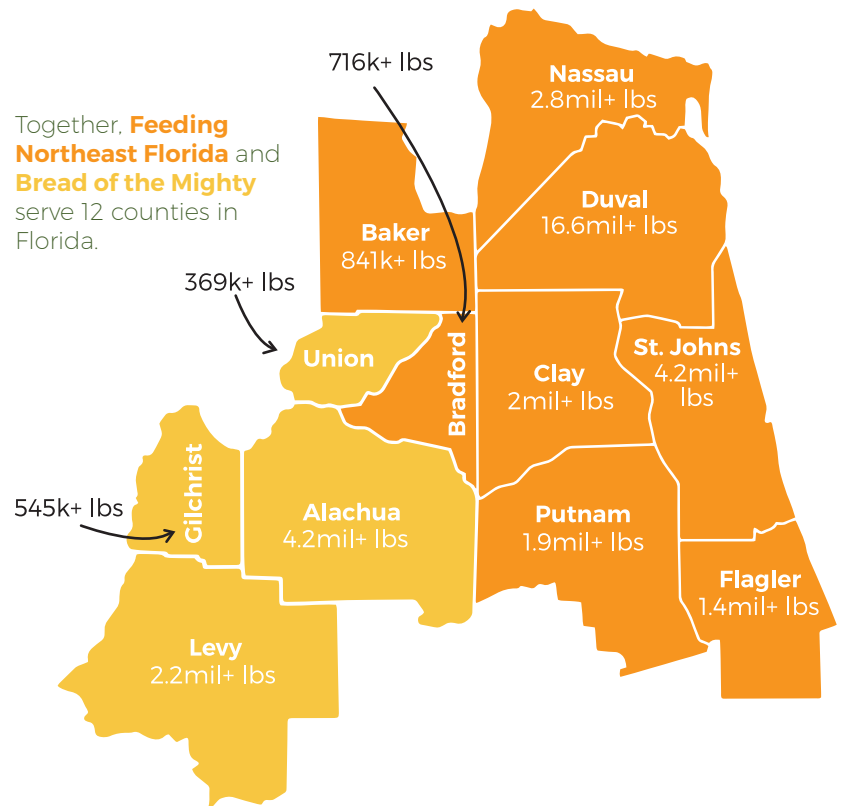

FEEDING[®]
NORTHEAST FLORIDA

How it Works

Our extensive food rescue operation collects food from over 200 retail stores, manufacturing centers, and farms daily. Using our fleet of 20 refrigerated trucks, we bring this food to our warehouses for sorting and quality inspection. Our partner network then distributes these resources directly to community members through local pantries and feeding programs.

Tailored to Community Needs

Each agency partner uniquely serves their specific community's needs. Agencies serving seniors can select foods that suit their dietary requirements, while those serving active-duty military may operate on schedules that accommodate service members' availability. Medical clinics supporting cancer patients have access to specific nutritional supplements that promote healing and wellbeing, and agencies serving families can request kid-friendly options that bring both food and smiles to the dinner table.

Excellence in Service

All partner agencies adhere to strict standards of excellence to ensure food is distributed quickly, safely, and with dignity. Regular monitoring ensures compliance with food safety guidelines and efficient distribution practices. This high standard of service ensures that families receive not just food, but also respect and compassion.
